

VSM - Victor Stamov Memorial 2017

VSM Variants

Example and actual performance <http://www.vsmsunrise.org/blog>

* **estimated time** will be calculated from uploaded graph as extrapolation of the position 10 sec after highest to RDT point by prolongation this line to the ground.
 ** **sinking rate** = flying time in sec / launch height in m 10 sec after highest point
 VSM *high and fly* - related to the ground VSM *AltiSim* - related to the RDT position
